

**Sale Name:** The Pre '30 Tractor Auction - 2024

**LOT 15 - Avery 8-16 \*Video Added\***

### Description

Avery Company offered this 8-16 model in 1914 as their answer to the small tractor trade. Weighing 4,900 pounds, it had a drawbar pull of 1,800 pounds, and used a two-cylinder opposed engine of 5 1/2 x 6 inch bore and stroke, delivering its rated horsepower at 750 RPM. This example has undergone extensive work and is in running condition. A lot of the hard work is already done with this tractor. The tractor is in primer and could be painted or left as is! Frame stamps include 10092 and 15610. Freshly built radiator with brass tubing. KW Model T magneto. Fabricated fuel tank. Dual Kingston 5 ball carburetors. Rocker arms have been repaired. Rear wheels have multiple welded spokes. One exhaust intake manifold has been repaired.

**Quantity:** 1
