### **Description**

Complete tractor. No mysterious welds or cracks on any part of this tractor. Exhaust manifold preheat tubes are all intact. See photos. This is an earlier model with the round spoked wheels. Tractor does run, however is currently winterized yet. This model year used the round fuel tank due to the upper radiator outlet comes out the back (see photos). I believe the gas tank on this tractor to be incorrect however it does work and is not leaking. Located in Clearfield PA.
