

Sale Name: 2025 Pre '30 Gas Engine Collection - Day 1

LOT 499 - Circa 1901 Meitz and Weiss Hot Bulb Engine

Description

The Mietz & Weiss, developed in 1893, is a unique American-made hot bulb oil engine. Its distinctive design features an integrated fuel pump that injects kerosene directly into the hot bulb. This engine, Sn. 1988, is the smallest size made at 1-1/2hp, has an exceptional restored finish, features numerous machined surfaces, a copper fuel tank, and brass plumbing. It is currently mounted on a display-ready platform with wheels and water tank.
