

Sale Name: 2025 Garden Tractor Consignment Auction

LOT 99 - International Harvester Half-Scale IH 806 Wheatland FWA

Lot Location Fremont, IN

Description

Make: International Harvester Model: Half-Scale IH 806 Wheatland FWA Fuel Type: Diesel Serial #: TLTC-0055 Year: 2024 Hours: 960 Tire Condition: New Lights About: This is a freshly created (2024) half-scale version of an International Harvester 806

Wheatland FWA. This tractor was commissioned and built by The Little Tractor Company after being on his waitlist for over 2 years. This is Kurt's 55th creation. Kurt's knowledge, craftsmanship, and expertise is well known. We started off with a low-hour (950 hours) and healthy 1990 Kubota B6200 that was completely gone through at a Kubota Dealership (all new fluids, clutch upgrades and adjustment, wire harness upgrades, new gaskets, updated glow plugs, etc.) and then Kurt took possession of it and created this masterpiece from an inspiration that my Uncle farmed with decades ago. The Kubota diesel was turbo-charged, and it sounds absolutely amazing. She whistles nicely. Our estimate is that the tractor produces approximately 20-22HP. This tractor features 4x4 with a locking rear differential, hydraulic rear 3 point (included but not attached), 2-Speed rear PTO, rear Draw Bar, and Hi-Low range. LED lights in the grill and a vintage work light hangs from the rear fender. My Uncle's full-sized 806 Wheatland FWA had front fenders, so these were recreated where they are shown installed in several pictures. The Wheatland's round fenders are beautiful and extremely heavy-duty (you could stand on them). The rear wheel weights are nice replicas of the full-size originals, and the front weights are a nice touch as well. The wheels were fabricated to give the tractor the best stance. New Firestone rubber all around: the rears are 12.5L-15 and 23x8.5-12 in front. Recreation of the M&W Turbo decal on the hood let's everyone know you got something different. This tractor runs and sounds amazing. It's a fan-favorite. It's a little bigger than you think, but it just fits in an 8' pick up bed. I can deliver this beautiful tractor for a reasonable fee if you desire. To be completely transparent, the donor tractor was purchased for \$5000, the Kubota dealership bill was \$3800, and Kurt's costs to recreate this beautiful machine was \$19,000. This is a \$28,000 build with a 2-3 year waitlist to be expected. Hydraulics PTO 3 Point Hitch Shipping Available: Yes Rear Wheel Weights Item City: Fremont Item State: IN
